

REF: NAB petition 04-160

The NAB's petition is a petition against freedom of choice, a God-given right in the USA. Conventional radio programing does not give me the choices I want, nor does it always transmit material that I want to hear or have my family exposed to. Advertising and biased news reporting are two excellent examples.

XM radio offers a choice, and I have cast my vote with dollars.

Wake up FCC! The alphabet TV networks and liberal radio are failing miserably. I'll stick with the winners, not the losers. Support the future and quality programming.

Time is money. Freeway congestion in LA is horrific. XM traffic and weather gives me instantaneous information that saves me valuable time. No other station does that.
